

ELIMINATOR

The Eliminator eliminates your problems

It Eliminates Waste ...

The resuscitation bag hanger turns on flow when the bag is removed for use, eliminating the need for continuous high oxygen flow to the bag.

It Saves Time ...

When time is critical, you don't want to be hooking up equipment. With the Eliminator you simply lift up the bag and flow begins instantly.

It's Preset ...

The standard configuration is available in three (3) pre-set flows. A fixed-flow barb controls flow to the resuscitation bag. The flowmeter operates

independent of the Eliminator and can be used for oxygen treatments.

It's Versatile ...

The Eliminator is also available in an adjustable configuration with a preset flowmeter setting that controls flow to the resuscitation bag. Especially useful in neonatal resuscitation. Left or right hand hanger locations are available on all models.

It's Convenient ...

The Eliminator is available with either chrome, compact or aluminum flowmeters. Connections for all standard wall outlet styles are available.
